New Feature: DocConnect – Secure Document Submission to Lenders

We're excited to introduce DocConnect, a new feature in Expert Pro that allows brokers to securely send documents directly to participating lenders.
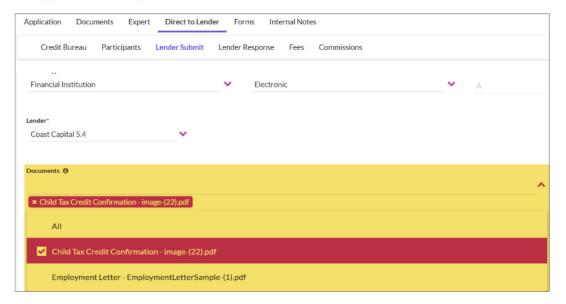

🔒 What is DocConnect?

DocConnect enables you to submit supporting documents to lenders that have this feature enabled — starting with Desjardins, with more lenders to follow as they adopt the capability.

📤 Submitting Documents During Application Submission

When submitting a deal to a DocConnect-enabled lender:
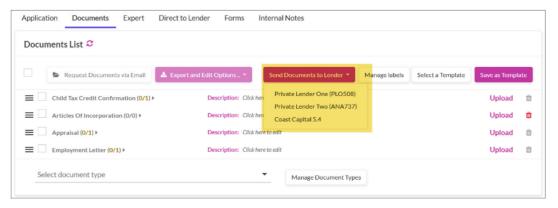

- A Documents dropdown will appear.
- You'll see a list of documents already uploaded to the deal in Expert Pro.
- Simply select the documents you wish to include with the submission.

📁 Submitting Documents After Application Submission

If you need to send documents after an application has been submitted:
- Go to the Documents page in the deal.
- If the deal has been submitted to at least one DocConnect-enabled lender, you'll see a "Send Documents to Lender" dropdown.
- Select the lender, and a modal will appear listing eligible documents.
- Choose the documents you want to send, then click Send Documents to securely transmit them.
